

DO YOUR RESEARCH BEFORE YOU BUY

It pays to be prepared when you start looking to purchase a vintage sewing machine. Really good deals are snapped up quickly so you have to be ready to move. I have found the following websites to be good sources for information about SINGER® vintage sewing machines although you will probably have to do some “digging”.

Singersewinginfo

A good place to start however the amount of detail available can be overwhelming if you are not familiar with Singer sewing machines. Main Website:

<http://www.singersewinginfo.co.uk>

Sewalot

The website design is a little quirky but there is lots of interesting information once you dig for it. Main Website: <http://www.sewalot.com/index.htm>

The Vintage Singer Sewing Machine Blog

This blog contains a huge amount of information although it can be a little hard to find specific information. Main Website (Blog): <http://vssmb.blogspot.ca>

Singer Sewing Company

The Singer Sewing Company hasn't forgotten its past. You can find manuals for many of the vintage models on their website. Website for Manuals:

<http://www.singerco.com/support/instruction-manuals/search>

International Sewing Machine Collectors' Society

The ISMACS International Website is a huge source for almost anything to do with vintage sewing machines. The website can be hard to navigate

Main Website: <http://ismacs.net>
